

Cerner Code Upgrade Fall 2025: Summary of Changes

Providers

Below is a summary of enhancements/changes for the Cerner software code upgrade scheduled for Fall 2025.

Change or System Impacted	Change Details	Link to Resources
Accessibility Features	Enhanced accessibility features: 1. Added functionality for keyboard navigation in mPages 2. Screen reader functionality utilizing Job Access with Speech (JAWS) screen reader 3. Ability to scroll when documenting in a PowerForm.	Cerner Code Upgrade Fall 2025 Accessibility Features.pdf
Auto Text: Order Comments & Special Instructions	Auto text can now be used in Special Instructions and Order Comments fields.	
Auto Text Multiselect	Auto text used during documentation that features multiple options in a drop-down menu has been enhanced to support multiselection.	Cerner Code Upgrade Fall 2025 Auto Text Multiselect.pdf
Medication Reconciliation	Additional options to proceed during discharge medication reconciliation have been added where a duplicate home medication is included and 'Do Not Continue After Discharge' has been selected. These options include: • Cancel/Discontinue Order: will display as 'Changed' on patient's discharge medication list • Complete Drug Therapy: will display as 'Unchanged' on patient's discharge medication list • Void/Mark in Error: will display as 'Unchanged' on patient's discharge medication list	Cerner Code Upgrade Fall 2025 Duplicate Home Medication Alert.pdf
Printing Preferences	Updates to create efficiencies in printer selection: 1. Patient Lists: ability to search for printer and add to favorites 2. Search tab added to the printer selection window	Cerner Code Upgrade Fall 2025 Printing Preferences.pdf

Symbols Denoting Further Details	Updates to symbols to denote further details are available: 1. <i>Modified Lab Reports</i>: when microbiology lab reports are adjusted, “Modified” will appear next to the result in PowerChart. In the Provider View mPage, a small triangle will be displayed next to the order containing the corrected report. 2. <i>Multiple Results</i>: A visual update has been made to the display of vitals when multiple results are recorded within the same minute (e.g., automatic HR and peripheral HR), indicated by a grey square.
